

Back2Earth Material Prep Guide

1. Remove anything that isn't compostable:
- stickers, rubber bands, twist-ties, plastics, etc.

2. If it has skin or a peel, cut it at least in half
- avocado, banana, citruses, onion, melon, squash, etc. (skip grapes & berries)

3. If it is larger than 2", chop it up
- roughly 1 to 2" chunks are fine

4. If it is dense, cut it into smaller pieces
- carrot, radish, broccoli/cauliflower stalk, rinds, etc.

5. For few cuts, go the long-way, for many, cut the width
- the smaller it is, the better it goes!
